Clinical Track Scholarly Contribution

Clinician-Educator

As a board-certified podiatric physician-surgeon specializing in wound care, limb preservation, and diabetic foot management, I have demonstrated leadership in clinical excellence, interprofessional collaboration, and patient-centered care. I have maintained a strong commitment to medical education through mentorship of residents, fellows, and medical students, as well as participation in global health initiatives such as the Barry University Bahamas Medical Mission. My scholarly contributions include peer-reviewed publications in journals such as *Advances in Skin and Wound Care* and presentations at regional, national, and international meetings. Since 2021, I have served on the Symposium on Advanced Wound Care (SAWC) Spring Planning Committee and Abstract Review Committee, helping shape nationally recognized educational programming. These combined efforts reflect my strengths in clinical innovation, academic service, and the training of future clinicians, aligning closely with the qualities of a Clinical Educator.
